

Call for Applications: Internship in the United States of America

The Mauritius Institute of Biotechnology Ltd (MIBL), in collaboration with the Colossal Science Foundation (the nonprofit arm of Colossal Biosciences) and Conservation Nation, invites applications for an internship in the United States of America (Dallas, Texas) under the *Conservation Fellow – AI for Conservation* programme. The internship will span a duration of 3 to 4 months (starting June 2026).

Profile Requirements:

- Enrolled in a Master's or PhD programme (Computer Science, Data Science, Engineering, or a related field) in a Higher Education Institution in Mauritius
- Proficiency in programming (Python) and machine learning
- Strong interest in biodiversity and environmental challenges

About Colossal Biosciences:

Colossal Biosciences is at the forefront of global scientific research, leading groundbreaking projects such as the de-extinction of the dodo, the protection of endangered species, and the restoration of ecosystems.

Terms and Conditions:

- The applicant should hold Mauritian citizenship
- Remuneration: The selected candidate will receive USD 35–45 per hour, depending on experience and skills and is expected to work 40 hours/week.
- Airfare: Round-trip airfare will be fully covered.
- Cost of accommodation will be borne by the applicant.
- For further information regarding accommodation, visa arrangements, and medical insurance, please contact the MIBL.

Mode of Application

Eligible candidates are requested to submit their application using the prescribed form- <https://form.jotform.com/260903076954563> along with their CV (3-pages max), testimonial (s), recommendation letter(s) and portfolio/Github (if applicable).

Applicants should demonstrate relevant skills, explain their motivation for applying and describe how the skills acquired during the internship will benefit their career.

For any query, please contact to MIBL via email at contact@miblmu.com or phone 490 02 22.

Application Deadline: 15 May 2026
